B The Innovation Hub of Food and Cosmetics Formulations

Vol.10 2017, Newsletter

ews

Momentive Performance Materials (MPM), USA in collaboration with Chemico Asia Pacific (Malaysia) Sdn. Bhd. held a workshop called "Inventing Possibilities - Beauty Chef Workshop" on September 28, 2017 at The Depot by JWC in Puchong, Selangor, Malaysia. We presented hair care, sun care, skin care and color cosmetic product information.

At the same time, we created beauty formulations the same way we cook healthy food. Raw materials were selected based on functional benefits; they were mixed with special formulation to create desired texture and concept.

The best powder foundation for 2017

It doesn't matter, you have oily or dry skin. These powder foundations are ideal for your skin type; all they do are for a flawless beautiful finish. Let's try them!!

MAC Studio Fix Powder Plus Foundation A one-step powder foundation that

gives skin a smooth, flawless, matte finish with medium to full coverage and a velvety texture that allows skin to breathe. Long-wearing, color-true, noncaking, all for 12 hours.

Laura Mercier Mineral Pressed Foundation

Composed of completely natural lements, this mineral powder foundation offers a natural, buildable foundation for sheer to full coverage. It's oil-free and water resistant, making it the perfect choice for summer.

Bobbi Brown Skin Weightless Powder Foundation

This oil-free creamy powder, cashmere-like powder delivers flawless finish and long-lasting wear. It has a soft, creamy texture that feels smooth and comfortable. The product blends evenly and seamlessly onto the skin as well as conceals imperfections, fine lines and pores for a natural finish.

Benefit Cosmetics Hello Flawless! Powder Foundation

This famous cover-up powder glides on naturally sheer and layers beautifully for customized coverage. The silky formula comes with a newly designed brush and a sponge for buildable of coverage as you desire.

Thai FDA Guideline for cosmetic advertisement: Whitening product

1. A statement or advertisement conveying the efficacy of a cosmetic is able to change or enable skin color to be whiter or different from the original skin color or other statement having similar meaning shall be prohibited.

2. An advertisement stating or implying that a cosmetic having properties to brighten skin must state that the cosmetic is not able to change the original skin color of the individual.

3. An advertisement referring to a study or test results from laboratories of any organization must clearly state that the results may differ on each individual.

4. The word "white" must be used under the definition of cosmetic and in accordance with the above mentioned guidelines.
