Pantone Spring/ Summer 2019 Color Trend Report

Pantone Color Institute, the global professional of color for the design industries as well as a trendsetter and color consultancy, announced Spring/ Summer 2019 Color Trend Report with the top 12 colors. All the colors are empowering and uplifting mind.

Pantone said "The mindset reflects our desire to face the future with empowering colors that provide confidence and spirit; colors that are uplifting; joyful hues that lend themselves to playful expressionism and take us down a path of creative and unexpected combinations."

For color of the year 2019, Pantone announced that Pantone 16-1546 Living Coral is the main color, an animating and life-affirming coral hue with a golden undertone that energizes and comforts with a softer feel. Pantone Living Coral is a color that represents the fusion of modern life and appears in our natural surroundings and at the same time, displays a lively presence within social media.

Pantone also identified 4 color shades that can stay in this season and works well with the top 12 colors as below.
